Art Unit: 1641

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 and 17-25, drawn to methods and diagnostic assay, classified in class 435/506, for example.
- II. Claims 15-16, drawn to a kit, classified in class 435/975, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a diagnostic assay for systemic lupus erythematosus, for example.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Select ONE illness:

- A. Crohn's disease (claims 3 and 18);
- B. gastrointestinal illness (claims 4 and 19); OR
- C. irritable bowel syndrome (claim 5).

If Applicants elect Invention I, then Applicants are required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-2 and 17 are generic. For example, if Applicants elect Invention I(A), then claims 1-3, 6-14, 17-18 and 20-25 shall be examined. If Applicants elect Invention I(B), then claims 1-2, 4, 6-14, 17 and 19-25 shall be examined.

Art Unit: 1641

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a). Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The inventions are distinct for the reasons given above and because the search required for Group I is not required for Group II. In addition, the searches required for species A, B and C do not appear to be co-extensive. Consequently, restriction for examination purposes as indicated is proper.

A telephone call was made to Attorney Jean Dickman on October 7, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
